CHANDIGARH ADMINISTRATION

c) Publicity and awareness campaign

For wider publicity of the contents of the 'Greening Chandigarh Action Plan-2012-13', all greening agencies/ departments will take up various publicity campaign. This will have to begin well in advance of the ensuing monsoon planting season. Forest Department will give advertisement in newspapers highlighting the importance of planting & nurturing trees and about free distribution of saplings from its nurseries.

d) Post Plantation Care and Watering

All Government, Non-Government Agencies and citizens should take necessary steps to maintain and protect plantations by preparing a proper maintenance and watering schedule. Since Chandigarh is a water deficit area, particularly in summer, due care should be taken to save trees and plants from water stress. While preparing watering schedule, following points should be kept in mind:

- Accessibility of plantation site,
- Edaphic, topographic and climatic conditions of site,
- Period of water stress,
- Type of tree/plant.

As Chandigarh witnesses a long dry spell of around 8 months in a year, extra efforts should be made to water the plants at regular basis to ensure higher survival percentage and better growth. To minimise the use of drinking water in watering lawns & plants, Municipal Corp. and Engineering Deptt. have laid tertiary water lines to various parts of the city.

“Reputation is precious, but character is priceless”
